****PROFESSIONAL SUMMARY****

Has experience collaborating on projects in Africa, Europe, Russia, and China.

QA Engineer with 5+ years of expertise in banking applications, payment terminals, and hospitality software (HRS). Strong experience in full-cycle testing, Python automation with Selenium and computer vision testing. Developed a custom bug-tracking system for a QA team. Professional English proficiency. Currently based in China.

****TECHNICAL SKILLS****

- **Programming Languages:** Python, JavaScript, C#
- **Testing:** Functional, Regression, API, Mobile, Desktop, Web, Payment Systems, Data Migration
- **Automation:** Pytest, Selenium, Computer Vision (OpenCV, PyAutoGUI)
- **QA Tooling:** Jira, Confluence, TestRail, Qase, Development of internal bug-tracking systems
- **Domain Expertise:** Banking/FinTech (PBF), Hospitality Software (HRS)
- **Platforms:** Web, Windows/Linux, Mobile, Windows/Linux server administration (PowerShell, remote control)

CI/CD & Virtualization: CI/CD pipelines (creation and maintenance), test environment provisioning, cloud services, virtualization (Proxmox), VMware

- **Languages:** Russian (Native), English (Professional), Chinese (Basic)
- **Methodologies:** Agile/Scrum, Test Planning

****WORK EXPERIENCE****

****QA Engineer**** | HRS (Hospitality & Retail Systems) | *Jan 2023 – Present*

International hotel management software

- Conduct full-cycle testing of enterprise hotel booking and management systems
- Develop Python autotests using Selenium and computer vision libraries (OpenCV, PyAutoGUI) for UI validation
- Perform data migration testing for customer databases
- Collaborate with international teams using English
- Implemented a Proxmox-based virtualization system to host CI/CD pipelines and isolated test environments, improving deployment automation and environment stability

****QA Engineer**** | PBF (Russia) | *Jan 2019 – Dec 2022 (4 years)*

Banking and financial software provider

- Tested banking applications and payment terminals (transactions, security)
- Conducted functional, regression, and integration testing
- Worked with SQL databases for data validation
- Created and managed bug reports in Jira, created documentation in Confluence • Created test documentation for banking features

****INTERNAL TOOL DEVELOPMENT****

****Custom Bug-Tracking System****

Initiated and developed to optimize team workflow

- Designed and built a full-stack bug-tracking system using C# and JavaScript
- Successfully implemented in a team of 3 QA engineers, improving release quality tracking, simplifying test case creation and migration, and facilitating management reporting
- Reduced task tracking time by ~35% and improved defect visibility

****EDUCATION****

- Railway Operations Management
- Test Automation Engineer

****LANGUAGES****

- ****Russian:**** Native
- ****English:**** Professional working proficiency
- ****Chinese:**** Basic
